VDL

Clamps for lifting steel drums with rim

Lifting of any size of standard steel drums in vertical or horizontal position, up to a weight of 1000 kg.

Accessory composed of a sling fitted with 2 clamps equipped with a system of drum rim pinch.

Ring with large dimensions for an easy fixation on common lifting hooks.

Lightweight

Only 3,5 kg! Positioning and tidying up without any means of handling.

Handy

The chain flexibility ensures an individual handling of the clamps for a positioning without any effort.
Clamps with reduced dimension for an easy handhold.

Robust

Capacity of 1000 kg, components in forged steel, chain in alloyed steel.

Safe

Positive hold of the jaw on the drum rim, clamping proportional to the load.

Other drums clamps of the Topal range
