ref.: **T6035 GB** rev.: **5**

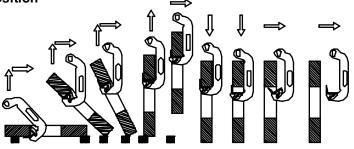

date: **Feb. 06** page: 1/2

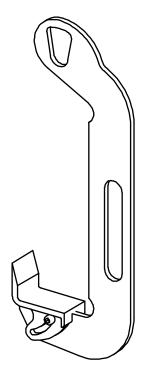

Applications

Lifting of coils and/ or turning over from the horizontal to the vertical position and vice versa.

Description

These accessories are fitted with a swivel shoe, locked during transport and therefore securing it which also permits the load progressive and regular turning. An operating handle makes the positioning easier.

Functioning

Turning: locate the shoe into the coil central hole thanks to the operating handle. Lift both C-hook and coil by moving the lifting means. The articulated shoe ensures a progressive turning and completes the lifting means movement. Once the coil has been set down, take out the C-hook thanks to the handle.

Lifting: locate the shoe inside the coil central hole thanks to the handle and perform lifting. The shoe locks itself, thus allowing the safe transport of the load.

Important instructions

- Check the condition of the shoe and its axle on a regular basis.
- Any coil to be turned over should be first placed on shims to allow shoe positioning.
- Working temperature: -20° to +100°C.

Subjected to technical modification without notice - Non contractual document.

CR

C-hooks for lifting and turning coils

ref.: **T 6035 GB** rev.: **5**

date: **Feb. 06** page: 2/2

General characteristics

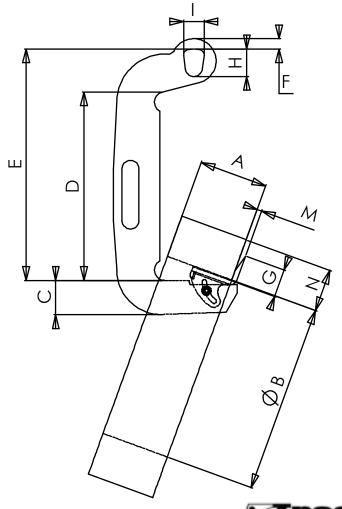

- Manufactured without load bearing welds.
- Hot epoxy coating.
- Safety factor: 3 in accordance with the EN 13155.2003 norm.
- Product conforms to the French regulation, in particular the decree of 01/03/2004 relating to the check on lifting devices and the European Directive n°98/37.
- Product with EC marking and delivered with a declaration of conformity and instructions for use.

<u>WARNING</u>! (A, B, N) load dimensions limits are to be considered individually as impossibility to operate. Handling safety is not guaranteed even though the load dimensions are included within the set limits; other factors, particularly proportion, mass, adherence to the floor are to be taken into account.

TO

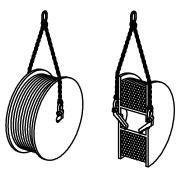

universal cable drum hooks

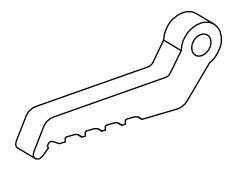

ref.: **T 6032 GB**

rev.: 6
date: Feb. 06
page: 1/1

Applications

Cable drum lifting.

Description

These accessories are adapted to many cable drums*. They fit holes with diameters from 55 to 83 mm. Slings and shackles not provided.

* ABN/ BBN/ CBN/ DBN/ EBN/ FBN/ GBN/ HBN/ IBN type following NF B 55-007 French standard.

Functioning

Once both shackles and 2-legged cable/ chain/ textile slings have been put together with the hooks, insert them either side of the cable drum axle, teeth downwards. Lifting ensures the hooks' locking in position.

Important instructions

- The hooks and cable drums' bearing surface must be free from grease or oil.
- Insert hooks in the right direction, ie. teeth downwards.
- Working temperature: -20° to +100°C.

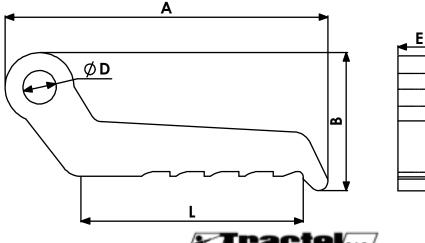

General characteristics

- Manufactured without load bearing welds.
- Hot epoxy coating.
- Safety factor: 3 in accordance with the EN 13155.2003 norm.
- Product conforms to the French regulation, in particular the decree of 01/03/2004 relating to the check on lifting devices and the European Directive n°98/37.
- Product with EC marking and delivered with a dedaration of conformity and instructions for use.

CC

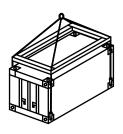

container lugs

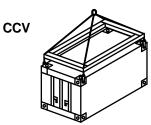

ref.: T6034 GB

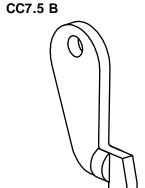

rev.: date: Feb. 06 page: 1/2

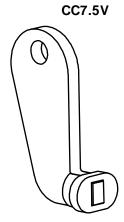

Applications

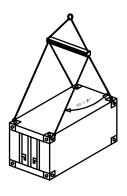

Lifting of containers by their standard ISO corners.

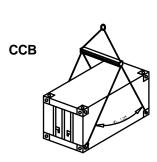

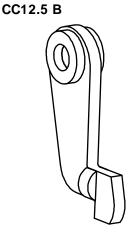

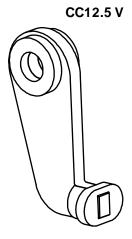

Subjected to technical modification without notice - Non contractual document.

Description

2 models:

CCB: container lifted by the top or bottom, slantwise traction. CCV: container lifted by the top or bottom, vertical traction.

Slings not provided.

Functioning

CCB: lifting with a single lifting beam and two 2-legged slings.

CCV: lifting with a spreader frame and 4 slings.

Important instructions

- Capacity of CCB model is specified on axle direction of the hook. Weight of container which can be lifted depends on sling angle.
- Do not use container lugs meant for slantwise traction (CCB) to pull vertically and vice versa.
- CCB container lugs for slantwise traction: adhere to a sling angle included between 90 and 120°.
- Working temperature: -20° to +100°C.

PC

lifting hook adaptator bracket with automatic safety for fork lift truck

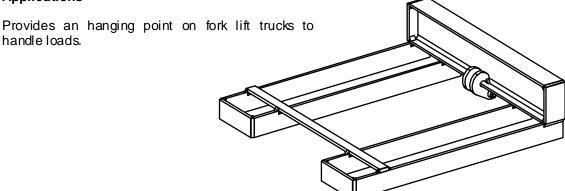

ref.: **T 6033 GB**

1/2

rev.: 6 date: **Feb. 06**

page:

Applications

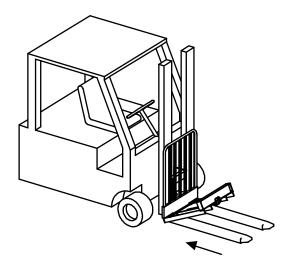

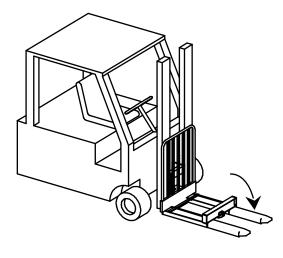

Description

These accessories are fitted with an immobilizing system on the fork lift truck tines ensuring that lifting operations are performed safely.

Functioning

Position the fork lift truck tines to about 50 cm from the floor and check their spacing. Fit the adaptator onto the tines (hanging point downwards) and butt it against the tines' vertical uprights. The adaptator is then immobilized.

Important instructions

- Ensure the adaptator is correctly driven home against the fork lift truck's tines.
- If Tractel Solutions does not provide the hook, ensure its WLL is the same as the adaptator one.
- Working temperature: -20° to +100°C.
